

Viper CS

HIGH-PERFORMANCE CRAWL SPACE VAPOR BARRIERS

Viper CS Vapor Barriers are designed specifically for controlling moisture migration in crawl space applications. They are manufactured with a bright white color to give any crawl space a fresh, clean look. Viper CS Vapor Barriers feature a low perm rating and are engineered with exceptional puncture resistance, tear resistance and tensile strength, providing a long-term solution for controlling crawl space moisture.

Insul-Barrier

REFLECTIVE INSULATION & VAPOR BARRIER

Insul-Barrier is a reflective blanket insulation composed of multiple layers of insulating material. The unique configuration allows the product to effectively control thermal and moisture migration at the same time. Insul-Barrier will not absorb moisture, making it an excellent choice for basements and crawl spaces. It qualifies as a Class A Vapor Barrier and serves as a high performance insulation that will retain its R-value over time.

- Class A vapor barrier
- Radon and methane gas barrier
- Non-fibrous
- Not affected by moisture
- Controls conduction, convection and radiation
